

iOS Initial Device Setup

1. Slide right on the 'Hello' screen where it says 'Slide to set up'
2. Select appropriate language
3. Select appropriate country or region
4. Choose a Wi-Fi network (This is optional; user can choose a Wi-Fi network or tap 'Use cellular connection')
5. Tap 'Enable location services'
6. Tap either 'Set Up as New iPhone' or one of the 'Restore from' options accordingly.
7. Tap either 'Sign in with your Apple ID' if you have already created an Apple ID or 'Create a free Apple ID' if you have not.

NOTE: You should not use a shared or personal Apple ID account on a corporate-owned device. Follow the sign up/sign in instructions depending on the option you chose.

8. Tap Agree in the bottom right corner of the Terms and Conditions screen then tap Agree.
9. Choose either Use iCloud or Don't Use iCloud accordingly.
10. NOTE: iCloud is not supported for the syncing of corporate data and has capacity limits.
11. Any additional data storage costs are not supported. Agree again on the following popup
12. Follow the instructions to setup the Touch ID or choose 'Setup Touch ID later'
13. Create a device passcode – re-enter the device passcode
14. On the Touch ID for iTunes & App Store screen, tap either 'Use for iTunes & App Store' or 'Set Up Later' depending on your preference.
15. Tap either 'Add a new Credit or Debit Card' or 'Skip Apple Pay' depending on your preference

16. Tap either 'Use Siri' or 'Don't use Siri' based on your preference
17. Tap 'Don't Send' on the Diagnostics screen
18. Tap either Standard or Zoomed view based on your preference
19. Tap 'Get Started' to complete the setup.
