

## Map drive – Using DOS option:

Note: Take the details of the PC drive details about network drive which you want to connect.

1. Go to a Dos prompt.
2. Now type in, net use \* \\arles01\data\users\gbrspi /persistent:yes.

Note: Change the drive path to the appropriate details and use the /persistent option if you require each time log in.

The syntax of this command is:

- NET USE [devicename | \*] [\\computername\sharename[\volume] [password | \*]] [/USER:[domainname\]username] [/DELETE] | [/PERSISTENT:{YES | NO}]]
- NET USE [devicename | \*] [password | \*]] [/HOME]
- NET USE [/PERSISTENT:{YES | NO}]

E.g.: You can use it like this:

net use: H: [\\ARLES01\SYS](#)

or

net use H: \\ARLES01\SYS /PERSISTENT:YES

or

net use H: \\ARLES01\SYS /PERSISTENT:N
