HP 1100 USB Printer Install

1. Connect printer to PC using USB cable. The PC will try and install the USB drivers for the printer.

2. Please cancel this action.

3. Open the Printer tool and select local printer.

4. This will create a printer set up. Go to the printers and faxes window

5. Right click the mouse on the printer just created (i.e. local) and choose properties then Ports

6. One of the LPT Printer Ports will be ticked. Please untick this box and then page down the list and find the USB entry (i.e. Port USB00 Virtual Printer Port)

7. Click on the USB entry which will add a tick in the box.

8. Finally click apply and OK then close the window.

9. The Printer will now be configured to work with the USB port selected.
