# Use the Net Use command to map a drive

You can use the net use command for batch files and scripts. To use the net use command to map or disconnect a drive:

To map a network drive:

1. Click Start, and then click Run.
2. In the Open box, type cmd.
3. Type net use x: \\computer name\share name, where x: is the drive letter you want to assign to the shared resource.

   Note: To make the drive mappings permanent, use the slash operator /PERSISTENT:YES as in following example: NET USE P: \\CEAPP0437\ASISTENCIA /PERSISTENT:YES will map the folder ASISTENCIA on server CEAPP0437 as drive on customer's computer, which will be represented as letter P:
