# Network printer with drivers on CD
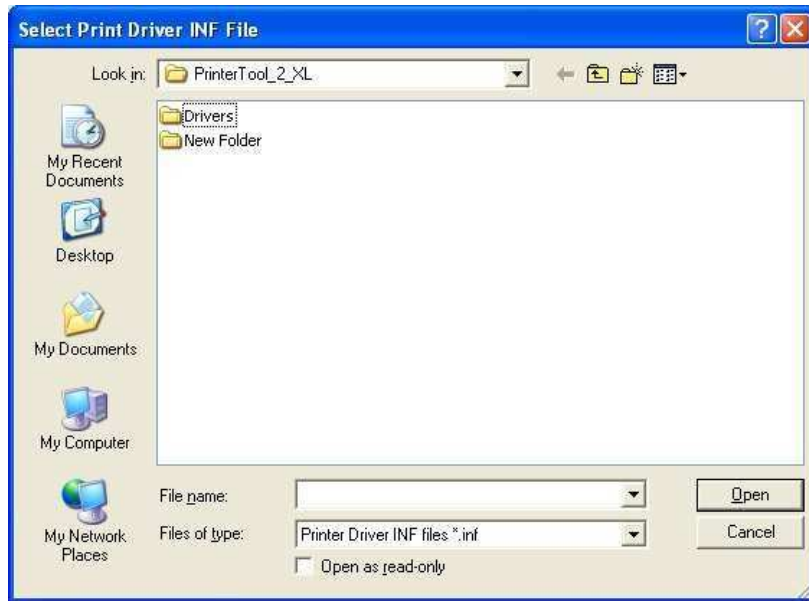

1. Navigate to **Start** > **All Programs** > **Tools** > **ZFS Global Print Tool 2.3 XL**

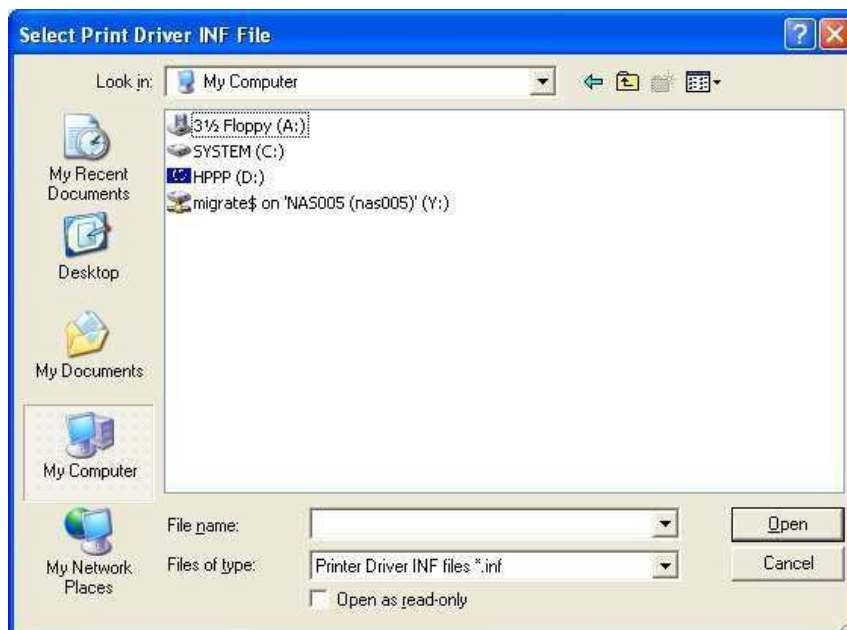

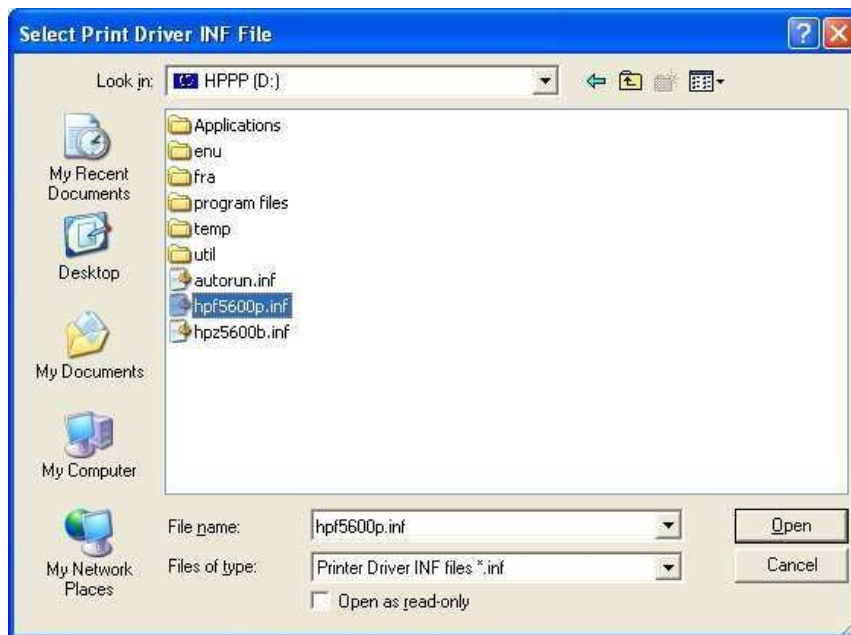

2. Select **Network** Printer

3. Click on **Driver File**, and then 'Select Printer Driver' window comes up

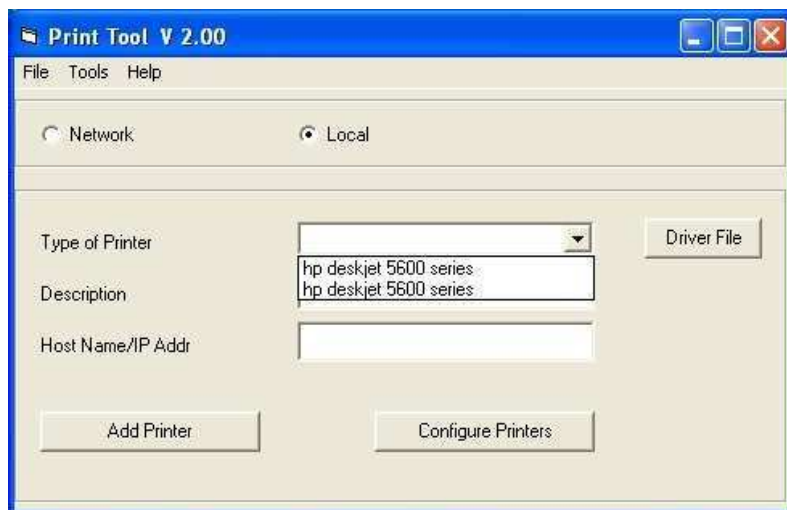

4. Put the Printer's CD in the drive and Click on **My Computer**

5. Double click the D: drive and select the appropriate printer driver and click Open

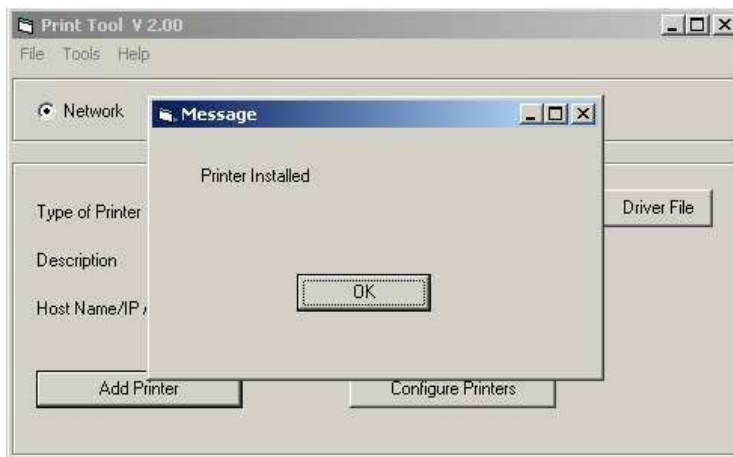

6. Go back to the Print Tool, click on **drop down** arrow key and select printer.

7. Insert **IP Address** or **hostname** for Network printer.

8. Click on **Add Printer**, and the Print Tool will locate the printer.

9. You are then given the opportunity to set it as your default.

10. Verify printer list and test print jobs.
